SHIMBAR is a first-grade EPC contractor in the Middle East and Central Asia mainly in water, wastewater and oil and gas services with offices in Iran (Tehran, Ahvaz and Kish), Uzbekistan (Tashkent), Tajikistan (Dushanbe), Iraq (Baghdad) and Oman (Muscat). Over 30 years of activity, SHIMBAR has designed, built and operated various infrastructure facilities providing water and energy services to more than 30 cities. The company typically self-performs all major disciplines including civil, structural steel erection, heavy mechanical equipment installation, process piping as well as electrical, instrumentation, and control and conducts business through a variety of contractual methods including full turnkey. EPC, design/build and traditional general construction or through discipline packages.
